Wallingford Medical Practice Post-Procedure Infection Report **2016/2017.**

Purpose of this document;

- As per Oxfordshire CCG Infection Control Policy, a report to show infection rates (requiring systemic antibiotic therapy) following an invasive procedure carried out at Wallingford Medical Practice.
- These procedures include;
 - Insertion and/or removal of an Contraceptive Implant (Nexplanon)
 - Insertion and/or removal of a Intrauterine Contraceptive device.
 - 'Minor Op's' including removal/drainage of cysts, and Joint Injections.

Clinicians at Wallingford Medical Practice have achieved;

- **100%** infection-free Contraceptive Implant fittings/removals
- **96%** infection-free Intrauterine Contraceptive fittings/removals
- **99%** infection-free Minor Surgery procedures
